

Says

What have we heard them say?
What can we imagine them saying?

The Global Air Transportation Network dataset is a comprehensive collection of information on airports ,airlines and their routes.

The dataset has been complied through meticulous labor by researchers all over the world to give a comprehensive detail into air transportation network from around the globe.

This includes information about airlines including their IDs, name aliases, IATA and ICAO codes, call signs country of origin and active/inactive status.

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

Examples of Transport:

- Examples of modes of transport used on land are buses, cars and so on.

- Examples of modes of transport used on the water are boats, ships and so on.

- Examples of modes of transport used in the air are airplanes, helicopters and so on.

Three Types of Air Transportation:
*Cargo Aircraft: They exclusively transport goods.

*Combi Aircraft: These carry passengers in the cabin and goods in the hold. The most well-known are those built by Airbus and boeing.

*Super Transporters: Aircraft designed to transport large goods.

Advantages of Air Transport:
*High Speed, Air is the type of freight capable of travelling long distance in short periods of time.

*Fast Services.
*Send almost every where your freight.
*High standard of security.

*Natural route.
*There is less need for heavy packaging.
*Risky.
*Cost.

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
